

In the Claims

1. (currently amended) A method for electronic mail notification comprising:

determining that it is a time for at least one of a reminder notification action and a report notification action;

opening a docketing program;

running a report;

saving the report for further processing;

for a reminder notification action, obtaining all action items within a given range from said report and processing the action items into at least one action item report and e-mailing the at least one action item report to at least one designated recipient; and

for a report notification action, obtaining a list of completed action items in a given range from said report and processing the list of completed action items into at least one completed action report and e-mailing the at least one completed action report to at least one designated recipient.

2. (currently canceled without prejudice)

3. (currently amended) A method for electronic mail notification as recited in claim 2 1 wherein processing the action items includes:

reading the saved report into memory;

parsing the report into items; and

filtering out unwanted items.

4. (currently amended) A method for electronic mail notification as recited in claim 2 1 wherein obtaining a list of completed action items includes:

reading the report into memory;

parsing the report into items; and

creating a list from the items.

5. (currently amended) A computer readable media including code segments for electronic mail notification comprising:

a code segment determining that it is a time for at least one of a reminder notification action and a report notification action;

a code segment opening a docketing program;

a code segment running a report;

a code segment saving the report for further processing

for a reminder notification action, a code segment obtaining all action items within a given range from said report and processing the action items into at least one action item report and e-mailing the at least one action item report to at least one designated recipient; and

for a report notification action, a code segment obtaining a list of completed action items in a given range from said report and processing the list of completed action items into at least one completed action report and e-mailing the at least one completed action report to at least one designated recipient.

6. (currently canceled without prejudice)

7. (currently amended) A system for electronic mail notification comprising:

means determining that it is a time for at least one of a reminder notification action and a report notification action;

means for opening a docketing program;

means for running a report;

means for saving the report for further processing;

A3 for a reminder notification action, means for obtaining all action items within a given range from said report and processing the action items into at least one action item report and e-mailing the at least one action item report to at least one designated recipient; and

for a report notification action, means for obtaining a list of completed action items in a given range from said report and processing the list of completed action items into at least one completed action report and e-mailing the at least one completed action report to at least one designated recipient.

8. (currently canceled without prejudice)

9. (currently amended) A method for electronic mail reminders comprising:

determining that it is a time for a reminder notification;

A4 opening a docketing program;

running a report;

saving the report for further processing;

A4
obtaining all action items within a given range from said report and processing the action items into at least one action item report; and

e-mailing the at least one action item report to at least one designated recipient.

10. (currently canceled without prejudice)

11. (currently amended) A method for electronic mail reminders as recited in claim 40 9 wherein processing the action items includes:

reading the saved report into memory;

parsing the report into items; and

filtering out unwanted items.

12. (currently amended) A computer readable media including code segments for electronic mail reminders comprising:

A5
a code segment determining that it is a time for a reminder notification;

a code segment opening a docketing program;

a code segment running a report;

a code segment saving the report for further processing;

a code segment obtaining all action items within a given range from said report and processing the action items into at least one action item report; and

a code segment e-mailing the at least one action item report to at least one designated recipient.

13. (currently amended) A system for electronic mail reminders comprising:

means determining that it is a time for a reminder notification;

means for opening a docketing program;

means for running a report;

means for saving the report for further processing;

means obtaining all action items within a given range from said report and processing the action items into at least one action item report; and

means e-mailing the at least one action item report to at least one designated recipient.

14. (currently amended) A method for electronic mail reporting comprising:

determining that it is a time for a report notification;

opening a docketing program;

running a report;

saving the report for further processing;

obtaining a list of completed action items in a given range from said report and processing the list of completed action items into at least one completed action report; and

e-mailing the at least one completed action report to at least one designated recipient.

15. (currently deleted)

16. (currently amended) A method for electronic mail reporting as recited in claim ~~45~~ 14 wherein processing the action items includes:

reading the report into memory;

parsing the report into items; and

creating a list from the items.

17. (currently amended) A computer readable media including code segments for electronic mail reporting comprising:

AC a code segment determining that it is a time for a report notification;

a code segment opening a docketing program;

a code segment running a report;

a code segment saving the report for further processing;

a code segment obtaining a list of completed action items in a given range from said report and processing the list of completed action items into at least one completed action report; and

a code segment e-mailing the at least one completed action report to at least one designated recipient.

18. (original claim) A system for electronic mail reporting comprising:

means determining that it is a time for a report notification;

means opening a docketing program;

means running a report;

means saving the report for further processing;

AC means obtaining a list of completed action items in a given range from said report and processing the list of completed action items into at least one completed action report; and

means e-mailing the at least one completed action report to at least one designated recipient.
